

Project Research Document - Project Title

XID and Name

September 27, 2013

The research document should provide detailed information on the project, its scope and aims, prospective users, and possible technologies that will be used for implementation. The research should include a review of the state of the art in the application area. More specifically the research document should provide information on the following topics:

1 Detailed Discussion x 1 Page

Take the idea you have selected and develop it providing a detailed discussion on the system functionality and what you propose it should do. Who are the users?

2 Existing Applications in this domain x 1/2 Page

In your research have you found anything close to this idea? List these in table form and identify similarities and differences

3 Platform, Technologies and Libraries x 1/2 Page

What platform, technologies and libraries are you planning to use?

4 The risks x 1/2 Page

What are the main risks to the project? (ie, are you depending on 1 library to provide key functionality?)
